

The following is the body of information contained
in a letter to C.E. Center, Vice President
Union Carbide Nuclear Company, March 15, 1956.
This is unclassified, A. Mante ORO-co
3/14/97

RHTG # 30,432
BOX # 1547
2122
317

Information is desired regarding operating conditions at each of the
Carbide installations in Oak Ridge that may have influenced airborne
instrument readings over the plants on the following dates in February,
1956:

| | |
|-----|------|
| 3rd | 9th |
| 5th | 18th |
| 6th | 19th |
| 7th | 20th |
| 8th | 21st |

We assume that pertinent information would include location and status of
criticality tests, reactor operating levels, sources in use, unusual
airborne activity, and any operations likely to have had influence on
radiation detectable by airflight over the plants or plant areas.

An early receipt of any information you are able to assemble will be
helpful. We greatly appreciate your cooperation.

Very truly yours,

N. H. Woodruff

S. R. Sapirie
Manager
Oak Ridge Operations
